About Evil Eye Gypsy

Evil Eye Gypsy's music is an eclectic mix of psychedelic, blues, alternative, hard rock and folk music. With a big guitar sound that touches on the shoegaze movement, the band's three guitarist create a dynamic that moves smoothly from haunting soundscapes to a huge wall of sound. Behind this is a strong rhythm section driven by powerful drums and punctuated with monster bass lines. On top of it all are soulful vocals that tell their stories .

An original band, Evil Eye Gypsy still plays quite a few covers when playing those venues that have patrons who want to hear familiar songs.

Indie Bands' Review

Evil Eye Gypsy came to my attention and I thought I should add this acid rock, blues band from Dayton in the USA.

This is so far away from my home territory, it surprises me too, but a slicing vocal can't help but intrigue. The melody is ripped asunder the moment we find the voices breaking in to the space. The septet have some inspirational compositions as they appear to emerge from pillaging a cemetery as their dark and foreboding music slithers ghost like from the speakers.

Evil Eye Gypsy manage to reign the multitude of instruments and musicians to a coherent out-put and despite all the odds, it is that dramatic vocal which pivots the band. Whilst they don't describe their music as such, they put the Goth in to Gothic. If Suicide Girls were ever looking for a sound-track, Evil Eye Gypsy would be the ideal selection."— Tim, Indie Bands Blog

Promotions

We understand that getting people into your venue is the name of the game. We don't expect you to promote our shows. It's our job to fill those seats. We work hard at promoting every show that we do. From flyers, to on-line promotions to newspaper ads, we get the word out. We are also solidly connected to the local music scene, and can book other bands with us for our shows, to further increase the draw for your venue.
